

Gen AI or generative Artificial Intelligence
to generate something using AI

Gen AI Tools
↳ chatgpt, co-pilot, gemini

↳ Gen AI history

↳ How Gen AI work!

Meta ↳ Meta llama

Microsoft - IBM

Best Practices for using gen AI

- 1) clear about labels for whom you're creating AI
- 2) accuracy of generated content, double check the quality with other AI tools.
- 3) familiarise yourself with common failure modes
- 4) Subject matter experts to identify problems.
- 5) create bias.

Specialised AI Tools

- 1) Text to Text input → chatgpt, claude, gemini, anthropic, google
- 2) Text to video → gemini, Runway, Heygen, Lika Labs, Deep Brain, Kling, notebookLM (educational)
- 3) Audio to Text → gemini, chatgpt, AssemblyAI, elevenlabs, google speech to text
- 4) Image generation from audio/text → Dall-e, chatgpt 5.5 (infographics), notebookLM (infographics), adobe firefly, gemini

- 5) Code generation
↳ chatgpt → codeit
↳ claude → claude code
↳ github → github co-pilot

Web Applications

- ↳ emergent labs
- ↳ Lovable
- ↳ google studio
- ↳ Lovable

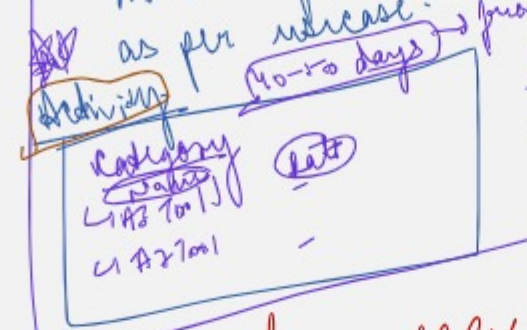

- 6) Music generation → Suno AI, Soundraw

Finance

- 1) Legal services
- 2) Medical ↳ robotic surgeons
- 3) Education
- 4) Sales
- 5) Marketing

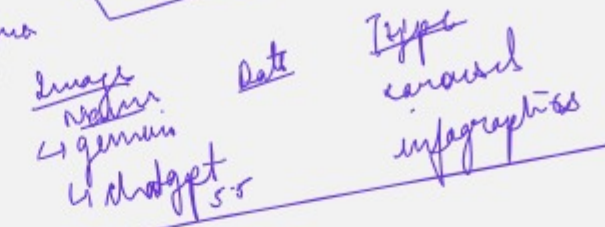

Gen AI user

- 1) How and best AI tool you use

Gen AI Builder

- ↳ AI API integration
- ↳ Agents, AI agents creation
- ↳ automations (n8n workflow)

LLM (Large Language Model)

- 1) Massive Data Training

- 2) Follow patterns

- 3) Deep learning

- 4) Natural language processing

- ↳ text
- ↳ summarize, article, email, code
